Ref: Your Report of 10 May 1959

1. Repair and/or retrofit of all customer-returned units will be done by Field Engineering in the future. Quality control on the gear boxes will be done by the Model Shop to Field Engineering Standards. Each unit will be returned with a work record showing the action taken. Enclosed are two sample work records showing the action taken on take-up and supply motors returned from your location.

2. The noise suppression kits for the "B" unit are undergoing test at the local field site. These kits will include one each additional metal cover. The existing metal heater covers will be used on the other side.

3. If we can be of any further help, please let us know.
